(a)
pooled growth rates, model
model
Gaussian
Laplace
density
growth rate / volatility of all growth rates
(b)
rescaled growth, model
fifth 1
fifth 2
fifth 3
fifth 4
fifth 5
Gaussian null
density
rescaled growth rate
(c)
rescaled growth, Compustat
fifth 1
fifth 2
fifth 3
fifth 4
fifth 5
all firms
density
rescaled growth rate
(d)
tail weight against size
excess kurtosis, |z| < 8
Compustat, 25 bins
model
Gaussian null
size rank
